

Thesis B Demo Assessment Components

There are two assessment components:

1. Technical Quality and Completeness of the work (80%)
Contents assessed: progress against the plan
2. Structure and delivery of the presentation (20%)
Contents assessed: presentation structure and delivery quality

Your demo should follow the following structure:

1. Descriptions of your project.
2. Your plan for Thesis B given in your Thesis A report.
3. Detailed progress report. Explain your results for Thesis B obtained so far.
4. Use a table to summarise all the tasks that you planned in Thesis A report to complete in Thesis B and explain which tasks have been completed and which tasks have not been completed. The main purpose of this component is to make assessors easier to assess your demo.
5. A revised plan for the rest of thesis work.
